

Terry McCorkle

Keynote Co-Presenter, Hackerfest 2011

About Terry

Currently a Cyber Security Assessment Specialist with The Boeing Company's Information Security Red Team, Terry has a long history of information security positions in both the private and public sector, including Washington Mutual, T-Mobile, US Air Force, and most recently at Boeing.

Dox Electronics, Inc. is proud to welcome Terry to be the next in an impressive line of keynote presenters for

systems and engage the audience in a down-to-earth discussion about things that people deal with every day.

"I have known Terry for 8 years. I have witnessed his awesome self motivated transformation from our days of telecomm and basic IT to advanced application security and penetration testing. Terry is a sharp security specialist who quickly masters technically detailed concepts and applies his knowledge in creative ways. He has become a highly respected asset to his unit and his expertise is frequently sought out amongst his peers. I always enjoy working alongside Terry."

— Lonnie B., Information Warfare Aggressor,
United States Air Force

Hackerfest, our annual security and technology trade show for Upstate New York, currently in our 13th year. Past events have shown tremendous response to keynote presentations by security professionals who can demonstrate vulnerabilities in security

Terry comes highly recommended with an impressive work history and engaging personality that will surely help to make Hackerfest 2011 a successful event for everyone involved.
